TID GUIDELINES

The Terminal Identification Number shall be 8 digits in length

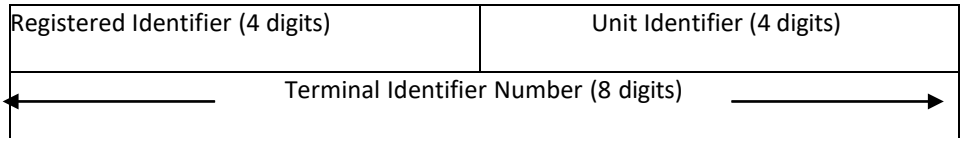
The TID number **shall** be composed of the following two components:

Registered Identifier (RID)

The Registered Identifier shall be issued by the Registration Authority and shall be the assignment as entered on the Register. The length of the RID shall be 4 digits.

Unit Identifier (UID)

The Unit Identifier shall be assigned by the holder of the Registered Identifier. The assignment shall be unique for each terminal product produced. The length of the UID shall be 4 digits.



A REGISTER of assigned TIDs to be kept by the Holder of the Registered Identifier
